Art Unit: 1616

Claims 1-125 are pending in this application which is a continuation-in-part of SN 09/926,521, which was filed under 35 USC 371 as the national stage application of PCT/US01/16550, filed May 21, 2001, which claims the benefit under 35 USC 119(e) of US Provisional Applications No. 60/206,628 (May 24, 2000), 60/205,524 (May 19, 2000), 60/273,234 (March 2, 2001), and 60/274,368 (March 8, 2001).

Applicants' claims are drawn to aqueous pesticidal compositions comprising a water soluble pesticide, surfactant, and a compound which affects cell membrane permeability

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 3, 4, 10-15, 26, 28-30, 41-46, 50-55, 61-64, drawn to pesticidal compositions comprising a water soluble pesticide, water immiscible organic solvent, and surfactant, classified in class 514, subclass depending on the active agent.
- II. Claims 2, 5, 6, 16, 17, 27, 56, 57, 65, 66, 70-73, 77-83, 87-94, 98-104, 108-115, 119-125, drawn to herbicidal compositions, classified in class 504, subclass depending on the active agent.
- III. Claims 7-9, 18-25, 31-40, 47-49, 58-60, 67-69, 74-76, 84-86, 95-97, 105-107, 116-118, drawn to glyphosate compositions and methods of use, classified in class 504, subclass 206.

The inventions are distinct, each from the other because of the following reasons: Inventions I and II/III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or

Art Unit: 1616

in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a pesticidal composition (e.g., an insecticidal or fungicidal composition) does not require the presence of herbicidal agents for utility. The subcombination has separate utility such as a herbicidal composition.

Inventions II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a non-glyphosate herbicidal composition does not require the presence of glyphosate to be a useful herbicidal composition; further, the presence of a non-specific herbicide such as glyphosate could render an otherwise selective herbicidal composition useless for controlling weeds in certain crops. The subcombination has separate utility such as a non-selective herbicidal composition.

This application contains claims directed to the following patentably distinct species of the claimed invention: pesticidal compositions, surfactants, and cell membrane active agents.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species<sup>1</sup> for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, all claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon,

---

<sup>1</sup>A single species is taken to be a composition comprising a specific pesticidal or herbicidal agent, and specific surfactant component(s).

Art Unit: 1616

including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

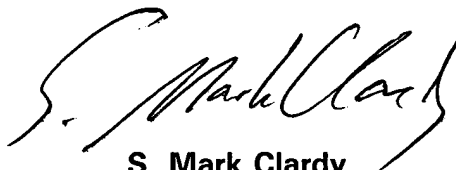

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to S. Mark Clardy whose telephone number is (703) 308-4550.
